Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/806,906

Applicant(s)

LANGBERG ET AL.

Examiner

ANN SCHILLINGER

Art Unit

3774

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 January 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SE/US)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 12, 13, 19-23, 30, and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Wilson et al. (US Pat. No. 6,569,198). Wilson et al. discloses the following: a method of remodeling a mitral valve annulus to reduce mitral valve regurgitation (col. 3, lines 30-45), comprising the steps of: advancing an adjustable prosthesis (12) in a first configuration to a position adjacent the mitral valve annulus; manipulating the prosthesis from the first configuration toward a second configuration that exerts a compressive force against the mitral valve annulus ((col. 5, lines 25-50); monitoring the degree of regurgitation through transeesophageal echo cardiography while manipulating the prosthesis from the first configuration toward the second configuration; assessing the degree of regurgitation in response to the monitoring step; adjusting the prosthesis to a third configuration in response to the assessing step (col. 6, lines 15-50). This method may be accomplished by accessing the venous system prior to the transluminally advancing step, or the subclavian vein using a catheter (col. 5, line 65 through col. 6, line 15).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-11 and 24-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of Wright (US Pat. No. 5,522,884). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose locking the prosthesis in a certain configuration. Wright teaches mitral annuloplasty rings where the rings are held in place by the various means claimed by the Applicant in col. 1, line 40 through col. 3, line 53 for the purpose of affixing the necessary parts of the prosthesis in their appropriate positions. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use the locking means in order to affix the necessary parts of the prosthesis in their appropriate positions.

Claims 14 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of Fowler, Jr. et al. (US Pat. No. 5,086,776). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose using surface echo cardiography to monitor the patient's hemodynamic function. Fowler, Jr. et al. teaches methods of monitoring heart performance using surface echo cardiography in col. 1, lines 10-25 to utilize its noninvasive properties. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use surface echo cardiography in order to utilize its noninvasive properties.

Claims 15 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of Killman (US Pat. No. 5,846,198). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose using intracardiac echo cardiography. Killman teaches heart monitoring means including intracardiac echo cardiography in col. 2, line 55 through col. 3, line 2 for the purpose of utilizing the procedure's improved imaging. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use intracardiac echo cardiography in order to improve imaging of the procedure.

Claims 16 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of Mehta (US Pat. No. 5,476,453). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose using fluoroscopy with radiocontrast media. Mehta teaches methods of coronary repair using fluoroscopy with radiocontrast media in col. 1, lines 34-67 for the purpose of utilizing its visual guiding capabilities. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use fluoroscopy with radiocontrast media in order to utilize its visual guiding capabilities.

Claims 17 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of McIntyre (US Pat. No. 5,291,895). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose using wedge pressure measurements to monitor hemodynamic function. McIntyre teaches methods of evaluating heart mechanical performance using wedge pressure measurements to monitor hemodynamic function in col. 15, line 61 through col. 16, line 15 for the purpose of utilizing its noninvasive properties. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made,

to use wedge pressure measurements to monitor hemodynamic function in order to utilize its noninvasive properties.

Claims 18, 36, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. in view of Kadhiresan (US Pat. No. 5,935,081). Wilson et al. discloses the invention substantially as claimed, but Wilson et al. does not disclose using an ongoing drug therapy. Kadhiresan teaches long-term heart monitoring procedures using an ongoing drug therapy in col. 4, lines 8-46 for the purpose of improving the patients' quality of life. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use an ongoing drug therapy in order to improve the patients' quality of life.

Response to Arguments

Applicant's arguments with respect to claims 1-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANN SCHILLINGER whose telephone number is (571)272-6652. The examiner can normally be reached on Mon. thru Fri. 9 a.m. to 4 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
